Practical Nursing Diploma , Algonquin College Ottawa, ON.	2013 - 2015

TECHNICAL SKILLS

Programming Languages: Java, SQL, HTML, CSS, Javascript, PHP, Bash

Operating Systems: Linux (Ubuntu), Windows, Mac

Databases: MySQL, SQL Server Management Studio, MS Access, Oracle, PostgreSQL

Software Tools: Eclipse, Apache NetBeans, Visual Studio Code, Cisco Packet Tracer, Wireshark, VMWare Workstation Pro, Microsoft Office Suite

ACADEMIC PROJECTS

Web Programming Assignment

- Using Visual Studio Code, developed an aesthetically pleasing personal portfolio showcasing a home page, resume section, and detailed courses list and descriptions.
- Implemented HTML, CSS, and Javascript to enhance the overall creativity, design and functionality.
- Employed web development techniques to integrate dynamic features such as a search bar, filters, sort-by options, animations, and URL links for an improved user interaction experience.
- Incorporated knowledge of elements, page navigation, proper semantic design structure, and indentation to enhance code readability and maintainability, resulting in well-organized and structured web pages.

Java Programming Assignment

- Used object-oriented programming knowledge to develop a Java program in Eclipse for creation of a patient's electronic health record.
- Assembled code to accept user data input and print a full patient health record in an organized and easy to read manner.
- Developed methods responsible for calculating age, maximum tolerable heart rate, and target heart rate range based on user input.
- Created additional test class to check formula precision and compare expected and actual values against a margin of error.
